8 Keys To Parenting Children With ADHD (8 Keys To Mental Health)

Synopsis

Compassionate and effective strategies for raising a child with ADHD. Parenting children with ADHD, whether diagnosed or undiagnosed, can be challenging and complex. But just as a child who struggles with reading can learn to decode words, children with ADHD can learn patience, communication, and solution-seeking skills to become more confident, independent, and capable. This book, rich with optimism, tips, tools, and action plans, offers science-based insights and systems for parents to help cultivate these skills. Combining expert information with practical, sensitive advice, the eight “key” concepts here will help parents reduce chaos, improve cooperation, and nurture the advantages—like creativity and drive—that often accompany all of that energy. Based on author Cindy Goldrich’s seven-session workshop entitled *Calm and Connected: Parenting Kids with ADHD*®, this book focuses on developing and strengthening effective interpersonal skills in both parents and children as a way to improve conflict resolution. Following the parenting principle to “Parent the child you have,” Goldrich offers advice to help readers tailor their parenting to meet the needs of their unique child. The book also leads parents to recognize the value of being a leader and a guide to children, building parents’ confidence in their decision-making, and giving children a sense of safety, security, and confidence. The principles outlined in *8 Keys to Parenting Children with ADHD* are appropriate for parenting kids of all ages—until they have “launched” and are on their own.

Customer Reviews

Informative and helpful. The first few chapters of the book were of more value than the latter part of the book.

This book answered many questions but also validated my concerns. It was like she had observed us in our home. I looked her up on the web and she is highly rated there as well.

Awesome book. Tons of great and useful information.

Great tips and practical!

Highly recommend this book for any parent raising a child with ADHD! Lots of helpful tips and information.

From the moment I picked up this book, I knew it was an important read for parents of children with ADHD. As one of those parents, I wished I had had Goldrich's knowledge and advice when I was raising my own child with ADHD (now an adult.) This book is filled with the latest research, and Goldrich puts it in clear and understandable language -- ready to apply in your home. Looking back on raising my child, I know I would have been a better parent had I read this book! I highly recommend!

This book is such a GIFT for parents. Raising a child with ADHD can be very challenging. I encourage so many of my patients who have a child with ADHD to get the help they need. The normal "rules" of raising a child often don't apply. The "Keys" in this book are essential, especially Key 6: Be Clear and Consistent. This is a book I would recommend to all of my colleagues and patients with children with ADHD. Education and strategies are key to helping children with ADHD.

This book is my "go to" bible because it offers step-by- step suggestions with highly effective advice.Scott Shapiro, MD - ADHD Expert, NY, NY

As a mental health professional working with parents and children with ADHD and having read many books about parenting children with ADHD, I highly recommend Cindy's new book. The book provides the reader with a rationale to help one understand why the author details the eight steps to successful and effective parenting of an ADHD child along with providing parents with a sense of hope in respect to building a satisfying , long lasting and cooperative relationship with the child.Lisa M Laudante, Ph.,D, LCSWR
