AGS Biology

Synopsis

Biology in clear, easy-to-read language Biology is a comprehensive life science program for your reluctant readers and those who require additional help to grasp basic biological and life science concepts. This full-color, easy-to-read textbook addresses all these needs. Written to meet national guidelines, students learn about classification and organization; patterns of reproduction, growth, and development; the human body's systems; ecological cycles; and other basic biological building blocks. Lexile Level 840 Reading Level 3-4 Interest Level 6-12

Book Information

Hardcover: 416 pages

Publisher: AGS Publishing (2003)

Customer Reviews

I used this for high school special ed biology. The regular HS text was so complex and huge and would have been like writing a new book to break down for kids in special ed...this book was simple, concise, and covered the right material. I supplemented with my own stuff. Worked great.

A good Biology text to use with students who have reading difficulties. Since the book is "basic" I would encourage supplementing the material with online and other resources.

Great condition! Thanks!
