Customer Reviews

I ordered this Kindle book because it was so much less expensive. I didn't realize it is actually a workbook. Upon using this for my first assignment, I realize it just does not work as an electronic book. The content and structure of the book seems interesting, but you obviously can not write in it to complete assignments and it is really tough to maneuver around the book as the content instructs

for further info to complete the assignments. There is a notecard option and notebook option which seems helpful in theory, but it does not work as you would expect and there is not much explanation on how to actually utilize these functions easily. I actually have to go and by the hard copy at this point. Very disappointing.

Book is filled with good info (5 stars). I rented this book which smells; has wrinkled, torn and seriously worn cover and pages; and the spine is barely hanging on. For few weeks of intensive study, I'll deal.

The book came in perfect condition and I really like the learning format. The text uses "programmed learning" to help you learn the information by providing fill-in-the-blanks as you read. I also feel the information is explained very well. This book was required by my LPN class but I would still recommend it on my own.

I received this book with the spine severely ripped. The book content is good. There is a bookmark-type tool to cover answers throughout each chapter. There are a lot of terms, prefixes, suffixes, and word roots. There is a certain teaching strategy for each chapter. As you read the questions, definitions, and sentences it is teaching you the terminology.

The book was as described. The only thing is that this book require you to teach yourself. If your teacher does not cover the information you will have a problem with pronunciation.

Loved this book very good learning strategies

Great for beginners. I like the "bookmark", but I wish the online access was more helpful in learning to memorize the terms. There were OK activities, but they didn't help to actually learn every term in the chapters.

great deal
