Exploring Vibrational Medicine

Synopsis

What proof exists that we actually possess a nonmaterial "energy body"? On Exploring Vibrational Medicine, physician Richard Gerber reveals behind-the-scenes research into vibrational healing and offers a new model of the organizing energy field that guides and sustains all life forms. How do acupuncture, the chakra system, and healing touch work? Can prayer and meditation affect our energy fields? Through study after fascinating study, you will hear about stunning research that supports the existence of a measurable energy dimension in all life forms—an "etheric body" that holds profound implications for the future of health and healing. Exploring Vibrational Medicine is a revolutionary view of the oldest and newest discovery in medical science—the power of the body to heal itself naturally. Topics: music and sound therapy; chakras and energy centers; the case for acupuncture and homeopathy; and much more. --This text refers to an out of print or unavailable edition of this title.

This was an awesome listen and very informative. As a medical provider who is objectively learning about energies it was nice to hear someone who is trained and knowledgeable in traditional western medicine talk about energies that have been poo-pooed until just recently. The interesting thing is that we in the physical sciences are proving in a lab what the ancients have been saying for thousands of years. I know these practices in energy aren't openly practiced or talked about in the medical offices, but many doctors are learning and practicing Reiki, reflexology, hypnosis, etc. If anyone is amazed with how far western medicine has come in the past 50-75 years, just wait until

we see what happens when more medical providers become trained in both medical arts!!! Cure rates of many diseases will greatly increase and we will see it happening in pockets of the medical community where both sides of medicine are practiced. And when we begin teaching our patients these techniques, we will be left to describe the effects as "WOW". Another book that I recommend, especially for medical practitioners, is "Molecules of Emotion" by Candace Pert, Ph.D. Dr. Pert is a biochemist and leading researcher in the field of chemical receptors. Her first huge claim to fame was discovering the opiate receptor in our bodies.

A very organized framework for understanding vibrational medicine to those more familiar with western medicine such as myself. Therapies that once seemed disconnected are connected through this framework.

I'm so glad I ordered this on CD because it's so deep but it's a book you want to have in your car and listen to it over and over again.

This is a great audio set. Dr. Gerber explains everything so well and thoroughly in a way that is easy to understand and grasp. I finally understand the difference between etheric and causal bodies now.

I've bought this item about 6 times and loan it out, this one I hope to keep for myself. Thank you

educational I have chronic fatigue and am working on the premise it is cell memory related and the book reinforces this outcome

Very pleased with product. Arrived early, and in the best of condition. It was a pleasure to do business with this company.

We own 3 of this book - it gets borrowed a lot. Very informative about energy healing. Can't say enough.
