Customer Reviews

The Complete Guide to Creating Oils, Soaps, Creams, and Herbal Gels for Your Mind and Body covers information on aromatherapy and provides many recipes for product making as well as presents information on extraction of oils, diffusion, carrier oils, essential oils, recipes for home use, bath salts, making soap, and beauty and wellness treatments. The book is interesting, well written, and recommended as a basic text for learning how to safely and effectively use essential oils for many different situations. --Jeffrey Schiller - Making Scents Magazine --This text refers to the Library Binding edition.

This is Marlene Jones first full-length book but she has been writing professionally since 2001 right after leaving journalism school. Over the years, she has written pieces on a variety of subjects,

focusing especially on issues of health and wellness related to low-income and minority communities. Her interest in all things natural sparked in 2005 after the birth of her first child and after being prompted by her older sister's quests to eliminate synthetic and chemical-laden products from her diet and cosmetics. Marlene's upbringing in Kenya is also a major source for learning how to be one with nature. She continues to learn the many different aspects of natural living and uses her platform as a journalist to inform others about the benefits available. When Marlene is not writing and researching, she is parenting her precious three babies, dabbling in politics, traveling the world, and working hard to be active.

I have been getting into essential oils and want to make my own soap and lotions. This book is excellent for a beginner. It has a lot of great information and easy to follow recipes. I have been dabbling in the oils already, but this book made me realize that the soap making is a little more than I can handle right now at this point in my life. But it also encouraged me that it is not a difficult process. So one of these days, I will be making my own soap. I highly recommend this book for beginners. It is an easy read and a page turner. I thoroughly enjoyed it

This is ok, but looking for more photos and help with melt and pour ideas.

Awesome book! I love the pictures and simple recipes.

This is a great book for beginners in that it explain a lot of the basics regarding tools and oils used in the making of soaps and creams. I especially like the detailed descriptions for a great assortment of essential oils that included uses and precautions.

Lots of useful information

I am excited to use this book. It shows you how to make everything from bath bombs to hair shampoo. Only had a chance to skim the book. Good book to get you on track to making your own products organically.

if you want to make soap or salve this is the book for you. i have a lot of books on the subject but found this one easy to use. i just loved the simple recipes.

Great information. Easy to follow directions!
