Stockley's Herbal Medicines Interactions: A Guide To The Interactions Of Herbal Medicines

Synopsis

Stockley's Herbal Medicines Interactions is now in its second edition and remains a unique collaboration between a team of experts in the fields of drug interactions, clinical herbal medicines, phytopharmacovigilance and regulation of herbal medicinal products. It provides an invaluable reference text for all healthcare professionals who require evidence-based information on the interactions of conventional medicines with herbal medicines, dietary supplements and nutraceuticals. Stockley's Herbal Medicines Interactions brings together available data on over 180 of the most commonly used herbal medicines, dietary supplements and nutraceuticals in highly structured, rigorously researched, and fully referenced monographs. Extensively updated for this second edition over 40 new monographs have been added for herbal medicines and dietary supplements, including Blue cohosh, Bergamot, Carnitine derivatives, Goat's rue, Hibiscus, Holy basil, Juniper, Kava and Squill. Substantial updates have been undertaken to the standing content, including revisions of the interactions of St John's wort, Milk thistle, Evening primrose oil, Ginkgo and many others. Key features include: Ease of use - structured format allows user to target key information at-a-glance. Clinically relevant - each monograph contains a concise summary on the available evidence and guidance on how the interaction can be managed. Ratings system - simple and intuitively understood, familiar to users of key drug interactions reference works. Worldwide appeal - as well as commonly used synonyms nomenclature includes approved pharmacopoeial names from Europe and the US. Indexing - full, comprehensive interactions indexing, with lead-ins from appropriate synonyms.

From reviews of the first edition

The book is essential in the fast developing field of "natural medicines" (or phytotherapy) and I recommend it to anyone involved in the production, prescription and dispensing of such products or in teaching in this field.

Michael Heinrich, Journal of Ethnopharmacology, 126 (2009) 375 (October)

'This book is a worthwhile reference tool for all those employed in the health service particularly those working in this field for which there is currently little documentation/evidence based information available.'

Translated. Dr F. Pank, Z. Arzn. Gew. Pfl. 14(4) December 2009
