Eames: Beautiful Details

Synopsis

"Eames: Beautiful Details" celebrates the seamlessness and fluidity in which Charles and Ray Eames operated as both a husband and wife team and as designers unrestricted by traditionally professional boundaries. Select details of their life and work, from their refined designs to their innovative experiments, and even including images depicting the everyday poetic moments of their lives, and are shared here in this exhibit within a book. Inspired by Charles's immersive and original slideshows, in which he expertly selected and grouped images together that communicated information in an aesthetic, direct, and accessible way, this book strives to visually create the Eameses' life and work by taking the viewer through a delightful journey, focusing on their "beautiful details." The packaging design of the "Eames: Beautiful Details" slipcase is a pattern inspired by the triangles and colors of one of their most inventive, if lesser known, designs for children, simply called, "the toy." It also pays homage to the patterns they used on their well loved House of Cards. The Eameses brought a sense of humor and joy to everything they created, and the design and layout of the book aims to convey that spirit in a visual feast for the eyes. It is a testament to the Eameses and the lasting value of good design that their Eames lounge chair, created in 1956, endures today as perhaps the most recognizable and coveted piece of mid century furniture design. Their experiments in technological innovations, like molded plywood and fiberglass, resulted in such classic pieces as the bent plywood LCW and DCM Chairs, the Molded Plastic Chairs, and the Aluminum Group; all of which are still in production by Herman Miller. Likewise, Charles and Ray designed and built their own home in 1949 in Pacific Palisades, and it is still revered as a landmark of modern architecture. Built as part of the Case Study program in California, sponsored by Arts & Architecture magazine, it was one of the earliest experiments in pre fab construction, using off the shelf industrial parts. But unlike the austerity of much of modern architectural design, their factory like shell was lovingly lived in along with their personal collections of folk art, treasures from their travels, and everyday objects refreshingly displayed with affection and without pretense. In exhibition design as well, "Mathematica: A World of Numbers ... and Beyond, 1961," for IBM is considered groundbreaking as an interactive, educational, and experiential way to communicate the wonder and magic of math. Similarly, their seminal film, Powers of Ten, 1977, expresses the mathematical concept of multiplying to the tenth power, in a very direct, simple, and powerful way. Unlike any other book previously published on Charles and Ray Eames, this unique monograph is a visual celebration of their work and life, and was created in true collaboration with Charles's grandson, Eames Demetrios, and other members of the Eames family.

Renowned designers Charles and Ray Eames are among the greatest designers of the 20th century. They are, of course, most well known for their groundbreaking and iconic furniture designs, but they also created important, creative, experimental, and beautiful work in the areas of architecture, exhibit design, textile design, product design, graphic design, toy design, film, and photography. Charles and Ray Eames brought a sense of innocence and playfulness to the design process, as well as a tremendous love and discipline in all they created in many different fields and mediums.

Incredible book. Full of inspiration and history. It was a must have for our Architectural office.

Excellent seller and product.

Beautiful, bright coffee table book. Substantial size.

We ordered a dozen Eames chairs for our office. They are classic designs and clients always ask about them, so I bought a couple coffee table books so our clients could browse through them while sitting in the conference room.

Beautiful book. Thought this might be overkill with more than a few Eames chairs lying around here, but the book is a beautiful piece itself. Nice and sturdy - this one is more than worthy of display.

Wonderful book great illustration's, Daughter in law loved this book.

This is a beautifully done book. I received it for Christmas and I absolutely love it! We live in a 1957 mid century style house and this book provides lots of inspiration and facts. I also love that it looks so nice sitting out on the coffee table.

Amazing book! Great for decoration
