Age Range: Baby and up

Grade Level: 1 - 2

## Customer Reviews

This has some great activities in it for kids, but is a lot of prep work for the teacher. If you have time to do the laminating, cutting and organizing it is worth it.

Colorful and engaging games for early and emergent readers. Centers are great to use at home or at school. Kids benefit from the repeated practice and love the fun game format of these activities.

This is a wonderful product that I highly recommend for k-1 teachers. I teach kindergarten in a district with high readers so the 1-2 level has been perfect for what we teach. I am planning on purchasing more of these types of books from the same series, perhaps the literacy centers next.

i found this book to be very detailed. it also follows the curriculum which makes this book a must have. it has really helped me when it comes to planning effective lessons.

Great independent, hands-on games for the classroom.

helpful when doing group work in order to allow other students to be productively busy.Helps when I dont have time to make my own

Definitely got my money's worth. The activities are engaging without boring the kids. Lots of cutting though but oh well.

great book
