Arts Of Living On A Damaged Planet: Ghosts And Monsters Of The Anthropocene

Synopsis

Living on a damaged planet challenges who we are and where we live. This timely anthology calls on twenty eminent humanists and scientists to revitalize curiosity, observation, and transdisciplinary conversation about life on earth. As human-induced environmental change threatens multispecies livability, *Arts of Living on a Damaged Planet* puts forward a bold proposal: entangled histories, situated narratives, and thick descriptions offer urgent “arts of living.” Included are essays by scholars in anthropology, ecology, science studies, art, literature, and bioinformatics who posit critical and creative tools for collaborative survival in a more-than-human Anthropocene. The essays are organized around two key figures that also serve as the publication’s two openings: *Ghosts*, or landscapes haunted by the violences of modernity; and *Monsters*, or interspecies and intraspecies sociality. *Ghosts* and *Monsters* are tentacular, windy, and arboreal arts that invite readers to encounter ants, lichen, rocks, electrons, flying foxes, salmon, chestnut trees, mud volcanoes, border zones, graves, radioactive waste—in short, the wonders and terrors of an unintended epoch. Contributors: Karen Barad, U of California, Santa Cruz; Kate Brown, U of Maryland, Baltimore; Carla Freccero, U of California, Santa Cruz; Peter Funch, Aarhus U; Scott F. Gilbert, Swarthmore College; Deborah M. Gordon, Stanford U; Donna J. Haraway, U of California, Santa Cruz; Andreas Hejnol, U of Bergen, Norway; Ursula K. Le Guin; Marianne Elisabeth Lien, U of Oslo; Andrew Mathews, U of California, Santa Cruz; Margaret McFall-Ngai, U of Hawaii, Manoa; Ingrid M. Parker, U of California, Santa Cruz; Mary Louise Pratt, NYU; Anne Pringle, U of Wisconsin, Madison; Deborah Bird Rose, U of New South Wales, Sydney; Dorion Sagan; Lesley Stern, U of California, San Diego; Jens-Christian Svenning, Aarhus U.

Customer Reviews

"Arts of Living on a Damaged Planet exposes us to the active remnants of gigantic past human errors—the ghosts—that affect the daily lives of millions of people and their co-occurring other-than-human life forms. Challenging us to look at life in new and excitingly different ways, each part of this two-sided volume is informative, fascinating, and a source of stimulation to new thoughts and activism. I have no doubt I will return to it many times."

—Michael G. Hadfield, University of Hawai'i at Manoa

Facing the perfect storm strangely named the Anthropocene, this book calls its readers to acknowledge and give praise to the many entangled arts of living which made this planet liveable and which are now unravelling. Grandiose guilt will not do, we need to learn noticing what we were blind to, a humble but difficult art. The unique welding of scholarship and affect achieved by the texts here assembled tells us that learning this art also means allowing oneself to be touched and induced to think and imagine by what touches us."

—Isabelle Stengers, author of *Cosmopolitics I* and *Cosmopolitics II*

What an inventive, fascinating book about landscapes in the anthropocene! Between these book covers, rightside-up, upside-down, a concatenation of social science and natural science, artwork and natural science, ghosts of departed species and traces of our own human shrines to memory... Not a horror-filled glimpse at destruction but also not a hymn to romantic wilderness. Here, guided by a remarkable and remarkably diverse set of guides, we enter into our planetary environments as they stand, sometimes battered, sometimes resilient, always riveting in their human and non-human richness. *Arts of Living On a Damaged Planet* is truly a book for our time."

—Peter Galison, Harvard University

Anna Lowenhaupt Tsing is professor of anthropology at the University of California, Santa Cruz, and a Niels Bohr Professor at Aarhus University in Denmark, where she codirects Aarhus University Research on the Anthropocene (AURA). Heather Swanson is assistant professor of anthropology at Aarhus University. Elaine Gan is art director of AURA and postdoctoral fellow at Aarhus University. Nils Bubandt is professor of anthropology at Aarhus University, where he codirects AURA.
