## Customer Reviews

"Once upon a time there was a Little House way out in the country. She was a pretty Little House and she was strong and well built." So begins Virginia Lee Burton's classic *The Little House*, winner of the prestigious Caldecott Medal in 1943. The rosy-pink Little House, on a hill surrounded by apple trees, watches the days go by from the first apple blossoms in the spring through the winter snows. Always faintly aware of the city's distant lights, she starts to notice the city encroaching on her bucolic existence. First a road appears, which brings horseless carriages and then trucks and steamrollers. Before long, more roads, bigger homes, apartment buildings, stores, and garages surround the Little House. Her family moves out and she finds herself alone in the middle of the city, where the artificial lights are so bright that the Little House can no longer see the sun or the moon. She often dreams of "the field of daisies and the apple trees dancing in the moonlight." Children will be saddened to see the lonely, claustrophobic, dilapidated house, but when a woman recognizes her and whisks her back to the country where she belongs, they will rejoice. Young readers are more likely to be drawn in by the whimsical, detailed drawings and the happy ending than by

anything Burton might have been implying about the troubling effects of urbanization. (Ages 3 to 6)

"This engaging picture book clearly presents a wealth of information." Booklist, ALA

There's a reason why this book has lasted through 70 years of cultural change in America. Kids love it. Moms and Dads love it. Grandmas and Grandpas love it. What's not to love? If you're an overly analytical adult, the kind who notices that when it comes to the perennial contest between rural and cosmopolitan values Virginia Lee Burton sides with the former -- well, what should you make of that? Shouldn't a well-rounded American upbringing allow each child to experience the emotional pull of "way out in the country" as well as experience the attraction of the city's bright lights? And, who knows? Reading to your child from "The Little House" might be complemented by, say, your child overhearing granddad doing his best Sinatra imitation, belting out "New York, New York."

Virginia Lee Burton versus Kander & Ebb, point and counterpoint: let the arguments flow. "All was quiet and peaceful in the country," versus, "I want to wake up in a city that doesn't sleeps." "The lights of the city were too bright ... She missed the field of daisies and the apple trees dancing in the moonlight ... Never again would she be curious about the city," contrasted with, "I'm leaving today. I want to be a part of it: New York, New York ... these little town blues are melting away." On the one hand, a modest little house that aspires only to set quietly on a hill crest overseeing a bucolic realm. On the other hand, an ambitious go-getter hoping to make it all the way to king of world, top of the heap. I came to read "The Little House" just recently after learning that it is the "lifelong favorite picture book" of novelist Anne Tyler. She vividly remembers her mother reading it to her, and when she became a mother herself Tyler enjoyed reading the story to her two daughters. She's even given away "several dozen copies" of the book as gifts to new babies. Tyler explains her love of the book in an article entitled "Why I Still Treasure 'The Little House'," which was published in The New York Times Book Review back in 1986. Tyler especially admires how Virginia Lee Burton managed in this small story "to say everything possible about change and loss and the passage of time." Tyler's essay, which I think is likely to increase your enjoyment of "The Little House," can be found online by doing a Google search of five words: Anne Tyler The Little House.

This is a sweet, classic book. It is rather text-heavy, so at this point, with a nearly two-year-old, we do a lot of paraphrasing and explaining what we're seeing in the illustrations. Our son thinks the house is neat to look at, especially as the pages turn and the house has many different backgrounds. Once we get to the actual story with him, I have a feeling he might find it kind of sad,

but it does have a sweet ending--if we can get that far.

I grew up with this book and purchased it for my 1½ year old. She really enjoys this book, watching the seasons change around the Little House and then watching as the city grows around it. She points at the horses in the country and the trucks in the city and traces the path of the sun with her finger. At first I was concerned that this book wouldn't hold her attention. She loves having books read to her, but she also is used to watching kids' videos on YouTube and playing with toys that light up and sing. By comparison, this book could be a bore. However, the wonderful illustrations and repetitive prose have kept her entertained for at least one reading each day since this book arrived. The heavy stock of the board book is perfect for her small hands as well -- no worrying about torn pages. As an aside, when this book arrived my spouse commented that reading this book as a child helped him better relate to the classic play "Death of a Salesman" when he read it in high school. I hope the author would be proud knowing her simple story for children resonates in dramas aimed at adults.

Although this award-winning children's picture book was written many years ago, it is amazingly relevant for today. The story follows the life of a little house, built long ago in the countryside and then slowly swallowed up by the spreading tide of urbanization, only to find itself surrounded by tall buildings, noise and hubbub, and condemned to destruction. The house is restored to happiness by being moved back out into the countryside, where it can once again enjoy the night sky and the songs of birds and laughter of children playing. Young children, age 2 to 6, will enjoy the story and pictures, even if they don't care about urbanization or anything else.

A favorite of our youngest child (who is now 29), purchased as a baby shower gift for her friend who asked those invited to bring their favorite childhood book. It is just as beautiful and meaningful as it was when we originally bought it for our children.

This is a good story; but its very long. Hard to keep a small toddlers focus to try to get thru the whole story.

This is a wonderful children's classic. My kids loved it and now my grandkids are getting their own!

A classic and timeless story. Loved it as a child and hope my children will love it too.
