Well laid out and perfect transition level from Grade 3 to 4. Still, half way through the book, my grandchild lost interest. This would be good for the first month of home school as a refresher before the real work begins.

My boy got this a month before he turned eight. He has been working on it for a few months, and he loves it. It's a little challenging for him, and he's super smart, so I would say this is better suited for a fourth grader.

This series of summer workbooks has been the best we've used! Fun activities and each of the pages are engaging and educational. It was great!! All my kids were doing "homework" and loving it!

My kids can't get enough of this book.

Great for summer learning and comes with answer keys!

Great!

Would prefer if there was more math in this booklet.

Another great item by Brain Quest. Had to buy something to keep up with school work over the summer.
