Lexi-Comp's Pediatric Dosage Handbook: Including Neonatal Dosing, Drug Administration, & Extemporaneous Preparations

Synopsis

The pediatric population is a dynamic group, with major changes in pharmacokinetics and pharmacodynamics taking place throughout infancy and childhood. Because of these changes, the need for the evaluation and establishment of medication dosing regimens in children of different ages is great. "The Pediatric Dosage Handbook, 16th Edition", continues to be the trusted resource for all medical professionals managing pediatric patients. Updates to this Edition include 17 new drug monographs, updates to hundreds of existing monographs, two new monograph fields, breast-feeding considerations, product availability, multiple appendix updates including antithrombotic therapy in neonates and children. The book also covers immunization guidelines, oral medications that should not be crushed or altered, pediatric HIV, serotonin syndrome, 855 drug monographs, up to 39 fields of information per monograph, usual dosage by age group (Neonatal, Pediatric, Adult), over 100 extemporaneous preparation recipes, dictionary-like headings at the top of each page, FDA 'Tall Man' lettering to help distinguish drugs with look-a-like names, therapeutic category and key word index.

Customer Reviews

The corners were very bent. Even a little water damage. I wish the description was more specific.

My daughter needed this book for a course she was taking in nursing school and saw the

description as NEW. When it arrived, it was wrapped in a brown paper bag with a hand-written address on the package. Upon opening this package, we found that the book was USED! So used as the corners were dog-eared and there were passages that had been highlighted. What a CHEAT this peRson was. I would have returned it but she HAD to have it right then. THE ONLY REASON I GAVE THEM 1 STAR IS BECAUSE I COULDN'T LEAVE IT BLACK.

The drug book has all the information required for students to look up pediatric medications and provide safe medication administration to their patients.
